design and analysis of cluster randomization trials in health research

Tue, 19 Mar 2019 02:11:00 GMT design and analysis of cluster pdf - Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters). It is a main task of exploratory data mining, and a common technique for statistical data analysis, used in many fields, including machine learning, pattern recognition ... Mon, 18 Mar 2019 05:18:00 GMT Cluster analysis - Wikipedia - A cluster randomised controlled trial is a type of randomised controlled trial in which groups of subjects (as opposed to individual subjects) are randomised. Cluster randomised controlled trials are also known as cluster randomised trials, group-randomised trials, and place-randomized trials.. A 2004 bibliometric study documented an increasing number of publications in the medical literature ... University MDRC NORC Georgetown ... - 1. Introduction. Cluster spacing is a key parameter in shale gas fracturing design. If the spacing is too small, the stimulated areas affected by major fractures may overlap each other and hence the efficiency of fracturing will be low.
